

Equipment Selection

Unlocking Engineering Possibilities

Helping the MEP industry, mechanical reps & design build contractors, by freeing them to be their best

We've combined US based engineering expertise and industry specific experience with our 200 plus professional team of engineers in India and Qatar who skillfully manage your engineering design related workload so that your organization can cherish the much needed freedom to explore a new world of possibilities.

05 +

LOCATIONS

Our services are distributed across 5 countries making us truly international.

08 +

EXPERIENCE

Leadership team with a solid five decade plus HVAC market experience & eight plus years in the service industry.

200 +

STRENGTH

Our team comprises of over 200+ skilled professionals from different engineering fields.

13,000 +

SERVICES

We have completed more than 13,000+ projects across the World.

EQUIPMENT SELECTION

Jersey Engineering Solutions provides selection services for the air-side & chilled water refrigerant controls. We offer equipment selection such as **VRV & VRF, AHU, FCU, FANS, Chillier Water Pumps, Grilles & diffusers , VAV Boxes & Fan power boxes, Dampers & Louvers, Valves and more.**

OUR SERVICES

Jersey Engineering Solutions provides equipment selection services for the air-side and chilled water refrigerant controls. We support in choosing the most suitable and efficient mechanical and electrical equipment for your construction projects. Equipment selected to meet local building codes and safety regulations ensuring project compliance.

Equipment selection services are therefore very useful for optimizing the performance, efficiency, and cost-effectiveness of MEP systems in construction projects while also promoting sustainability and compliance with industry standards.
