Quantity Take Off

Unlocking Engineering Possibilities

Helping the MEP industry, mechanical reps & design build contractors, by freeing them to be their best

We've combined US based engineering expertise and industry specific experience with our 200 plus professional team of engineers in India and Qatar who skillfully manage your engineering design related workload so that your organization can cherish the much needed freedom to explore a new world of possibilities.

05 +

LOCATIONS

Our services are distributed across 5 countries making us truly international.

08 +

EXPERIENCE

Leadership team with a solid five decade plus HVAC market experience & eight plus years in the service industry.

200 +

STRENGTH

Our team comprises of over 200+ skilled professionals from different engineering fields.

13,000 +

SERVICES

We have completed more than 13,000+ projects across the World.

QUANTITY TAKE OFF

Our team of skilled engineers provide reliable take-off services for construction projects across all fields including civil, MEP systems, and general purpose buildings using advanced software like Bluebeam, Planswift, and Onscreen Takeoff to meticulously measure quantities from floor plans which are compiled into comprehensive, accurately organized reports as per your requirements.

SPECIALIZED QUANTITY SURVEYING SOFTWARE-AIDED QTO

Accurate measurement and estimation of quantities for construction projects in diverse fields like civil, MEP, etc.

Utilization of advanced software tools like Bluebeam, Planswift, or specialized QTO software for precise calculations and project evaluation.

CUSTOMIZED REPORTS & DOCUMENTATION

- Preparation of comprehensive reports outlining the measured quantities, including breakdowns.
- Customized documentation catering to the specific needs of clients or projects.

QUALITY ASSURANCE & COMPLIANCE

- Ensuring compliance with industry standards, regulations, and best practices during the quantity estimation process.
- Quality checks to maintain accuracy and reliability of the quantity take-off data.

DOMAIN-SPECIFIC QTO SERVICES

Tailoring QTO services to different industries like real estate, infrastructure, manufacturing, etc., based on their unique requirements and standards.

CONSULTANCY & PROJECT SUPPORT

Support throughout the project lifecycle, from initial estimation to final execution.
