

# AR / VR Modeling

# Unlocking Engineering Possibilities

**Helping the MEP industry, mechanical reps & design build contractors, by freeing them to be their best**

We've combined US based engineering expertise and industry specific experience with our 200 plus professional team of engineers in India and Qatar who skillfully manage your engineering design related workload so that your organization can cherish the much needed freedom to explore a new world of possibilities.

**05 +**

## LOCATIONS

Our services are distributed across 5 countries making us truly international.

**08 +**

## EXPERIENCE

Leadership team with a solid five decade plus HVAC market experience & eight plus years in the service industry.

**200 +**

## STRENGTH

Our team comprises of over 200+ skilled professionals from different engineering fields.

**13,000 +**

## SERVICES

We have completed more than 13,000+ projects across the World.

# AR / VR MODELING

**Elevate your engineering projects with our cutting-edge AR & VR Modeling services.**

We specialize in immersive, interactive experiences, seamlessly integrating virtual and augmented reality into engineering processes. Enhance visualization, collaboration, and decision-making, ensuring a transformative and futuristic dimension to your projects within the engineering services industry and more.

## OUR OFFERINGS

We provide state-of-the-art AR(Augmented Reality) & VR (Virtual Reality) 3D modeling at affordable prices that are custom-designed by professionally trained industry leading experts. These value-added services present you with cutting-edge solutions for immersive digital experiences.

They create interactive 3D models and environments that enhance value across various industries in the segment. AR & VR modeling enable users to engage with realistic, computer-generated simulations that augment the real world (AR) or create entirely virtual environments (VR) for an array of applications

“

Jersey Engineering was truly a game-changer for me in showcasing a graphical design and presentation utilizing 3D virtual reality. My client was blown away on the level of detail Jersey put in design for me. I can confidently say they instilled confidence in me presenting on our equipment design. Their expertise and dedication to the level of detail we were looking for surpassed all my expectations!

-MRG
